

## Design for Senior Living

### Experience

CJMW Architecture and its predecessor firms have been designing retirement communities since 1968. Projects have included Life Plan Communities, independent living, nursing care, assisted living units, and special care units for Alzheimer's care. We have provided services for many types of communities – for-profit and not-for-profit, moderately priced to high-end, church affiliated and non-church affiliated. Much of our business comes from repeat clients.

CJMW Architecture's senior living design approach is based on resident focused, value-based, project-specific design. Every project we design is a unique response to a client's program, site, budget and other unique circumstances. We partner with our clients in a relationship characterized by mutual vision, trust and good communication – with the ultimate aim of achieving client goals. Our deep experience in senior living design paired with significant hospitality and healthcare design expertise leads to exceptional spaces that not only engage residents but that are operationally smart.
