

BIM Leader

We are seeking a motivated self-starter to oversee the BIM process as the firm's BIM Manager. The BIM Manager's role will be to provide leadership and management of the overall BIM process within the entire company. The BIM Manager will work to improve the efficiency of the BIM efforts in each office by implementing standards, organizing the BIM environment, training and supervision of BIM users and effective communication with both internal and external clients.

Responsibilities will include software management and implementation, establishing and maintaining standards and templates, training and supporting staff in using BIM, supporting project work, and helping guide the firm's integration and expansion of BIM use into areas beyond model creation. You will need to be available at times to work outside normal office hours, and you must have availability for travel between offices (NC and VA) as well as travel to conferences, training, and seminars.

Qualifications:

- Previous experience using BIM software (minimum 3-5 years)
- Self-starter with ability to lead a team of professionals
- Strong verbal, written, and presentation / training skills a must
- Minimum 2 YEAR ASSOCIATES degree – related discipline preferred
- Previous experience in a professional services environment, preferably in an A/E Firm.
- Previous experience in a similar position preferred
- Experience in ArchiCAD preferred

This is a full-time position with benefits in a casual and non-corporate working environment. The position is located in the firm's Winston-Salem office however, we are open to discussions about alternate arrangements for the right candidate.
